

Husqvarna K 970 Ring

When you need to make deep cuts fast our K 970 Ring is the answer. It has an exceptionally cutting depth of 270 mm, twice the amount of a traditional power cutter. It has a high cutting capacity, can make deep cuts from one side and is the quickest method for small and medium-sized cuts, as no time is lost on installing rails.

ERGONOMIC AND EASY CUTTING

Efficient cutting with less strain on your body, thanks to its low weight, ergonomic handle and low vibrations.

HIGH POWER WITH LESS FUEL

Our built-in automatic filter compensation SmartCarb™ maintains high power and lowers fuel consumption.

LIGHT AND POWERFUL

A light, compact and powerful machine with superior power-to-weight ratio.

LONG SERVICE INTERVALS

A strong Poly-V belt combined with our maintenance-free starter DuraStarter™ and efficient filter-system Active Air Filtration™ ensures long service intervals.

Features Husqvarna K 970 Ring

- Low fuel consumption and emissions
- The only time the filter needs to be checked and changed is if you experience lack of power.
- Our virtually maintenance free starter, thanks to the dust-sealed starter and the durable starter cord.
- Provides better transmission of power, less frequent re-tensioning and extended service intervals.
- Thanks to the peripheral drive you can cut far deeper than with a traditional power cutter. The cutting depth of 270 mm is sufficient to cut through a normal wall from one side only.
- With the peripheral drive of the ring cutter, you can cut far deeper than with a traditional cutter with a centre driven blade. On the ring cutter the cutting depth is not limited by a blade spindle.
- The water adjustment gives an efficient dust management and makes operation easier and more efficient.
- Our X-Torq® engine produces less emissions, lower fuel consumption and produces more power.
- Our dust-sealed starter, where the return spring and the pulley bearing are sealed, gives a virtually maintenance free starter. Developed with a durable starter cord.
- Our built-in automatic filter compensation maintains high power during the air filter life time.
- EasyStart ensures easier starting by reducing the compression in the cylinder.
- Reduced vibrations in the cutter handle for more comfort and longer operation periods.

TECHNICAL DATA	
Engine	Air-cooled 2 stroke engine
Cylinder displacement	93,6 cm ³
Power output	4,8 kW
Fuel tank volume	1 lit
Idling speed	2700 rpm
Vibrations front handle	3,8 m/s ²
Vibrations rear handle	5,1 m/s ²
Sound pressure level at operators ear	103 dB(A)
Sound power level, guaranteed (LWA)	116 dB(A)
Blade diameter	370 mm
Max cutting depth	270 mm
Weight (excl. cutting equipment)	13,6 kg
